GENERAL REMARKS AND NOTES

For original listings see pages 88/92 of Mr Jennings' Book. Where no details of lettering dimensions are given the die is the one listed by Mr Jennings.

Where dimensions are given then,

N1 = Not a new die but Jennings records two or more dies with this lettering.

N2 = A new die for Line Engraved but it also comes on other issues (generally SF)

N3 = A new die but Jennings records other dies with similar lettering.

N4 = So far as I know this is a completely new die.

I am indebted to Mr J. Nelson for his help in checking and producing this list. I hope to add a listing of unrecorded plates of recorded dies of 1d line engraved fairly soon.

K. Rymer Young
